# Guidelines:

## COVID-19 Prevention Measures

ECM: 203232  
Date: July 1<sup>st</sup>, 2020

---

### Introduction

This document is to be used as a reference document for Task Risk Assessments (TRAs) and details measures to be in place while working with multiple people on TAQA sites with the aim to prevent the spread of COVID-19 (or Corona virus). The strategy used in this document is largely based on occupational hygiene. The strategy consists of measures aimed at preventing contaminated personnel to work at TAQA sites and in addition, reduce the risk of contamination at the work location.

The instructions are based on the guidelines as presented by the RIVM<sup>1</sup>.

These instructions shall be communicated to the applicable contractors in advance of the activities to be performed.

**Note:** These Guidelines are applicable for all the work that has been identified as critical based on the flowchart as defined by Operations (refer to ECM #203377).

### Instructions

Activities	Risk	Mitigating Measures
Pre-working activities, when arriving on site	Having potentially contaminated personnel working on site.	<ul style="list-style-type: none"> <li>• Personnel must only come to work if they do not have any health complaints (for at least 24 hours), this also includes mild colds (e.g. runny nose, chapped throat, mild coughing, etc.);</li> <li>• If a member of a personnel's household is developing possible symptoms of COVID-19 (e.g. persistent cough and/or high-temperature fever) then personnel must not attend a TAQA site for a period of 14 days from when they first became ill;</li> <li>• When driving to the work site, sharing a vehicle with other people (carpooling) is allowed. However, all personnel in the vehicle must wear a surgical face mask when driving with more than 1 person onboard<sup>2</sup>;</li> <li>• Personnel will be submitted to a temperature scan. In case their body temperature is above 38 degrees °C, personnel will be denied access to the site;</li> <li>• In case the minimum distance of 1.5 meters between personnel waiting at the permit desk can not be sustained, personnel can be asked to wait in the room across the permit desk (at the Overkant office);</li> <li>• Coveralls shall be cleaned regularly;</li> <li>• Personnel visiting a TAQA offshore installation for more than 24 hours will be submitted to COVID-19 testing at Den Helder Airport prior to flying offshore. Testing results will take approximately 24 to 48 hours to be analysed. Until the results are in personnel will need to wear surgical face masks while in being in the accommodation or outside when the 1.5m social distance cannot be adhered to.</li> </ul>
While being present on TAQA sites / offices	Contamination of COVID-19 between personnel on site.	<p>Implement standard occupational hygiene practices:</p> <ul style="list-style-type: none"> <li>• Wash your hands regularly with soap and water (for a detailed instruction refer to Plusport for a training regarding the proper way to wash your hands);</li> <li>• Cough and sneeze in the inside of your elbow;</li> <li>• Use tissue paper, and dispose directly after use;</li> <li>• Do not shake hands;</li> <li>• Keep 1.5 meters (two arm lengths) apart;</li> <li>• Clean / disinfect tools where possible, whenever you are done with your work or go on a break;</li> <li>• Use your own equipment as much as possible.</li> </ul>
